

DPS-5600

Prepack Scale Printer designed for operational comfort and environmental friendliness.

DPS-5600 is a high-performance prepack scale printer. Reduces work load with easy and simplified operation, and conserves label consumption to achieve lower cost and a smaller environmental footprint.

High productivity

Reduces work load by aggregating two labels into one. Larger color touch screen provides easy operation. Label content can be easily checked on the display at any time, helping to prevent labeling errors.

Economical & Ecological

A linerless auto-label-sizing function compresses wasteful margin areas, helping with conservation of label usage.

Use of linerless labels minimizes waste disposal requirements, providing environmental consideration during daily work.

Effective presentation by various labels

Flexible label design without restriction to a single label size enables you to highlight not only common product information, but also product characteristics and freshness. Printing information such as recipe tips for consumers enhances promotional value. Shelf labels help improve productivity, while wrap-around labels deliver an impression of quality.
